

The Shire Society

Heritage and modernity

We wish to maintain our timeless traditions, to conserve our past and protect our future. We promote family, community, spiritual and religious beliefs as the foundation of a cohesive society. We are anti materialist and stand against soulless consumerism and the one world mono culture promoted by the global elites. We embrace new digital technologies that help to empower local communities

Localism and globalism

We wish to preserve our local regions and identities and we want to protect and preserve our natural environments. We stand with local and regional businesses against the onslaught of global corporations. We stand against the global elites and the New World Order and oppose the new creeping technocracy that is paving the way to our enslavement and the enrichment of the global elites.
